

DISPOSE OF SHARPS SAFELY!

WHAT ARE SHARPS? NEEDLES | SYRINGES | LANCETS | AUTO INJECTORS

WHY? REDUCES ACCIDENTAL NEEDLE STICKS & THE SPREAD OF DISEASE

Steps to Safe Disposal

Dispose of sharps in a **personal sharps disposal container**.

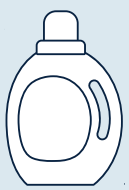

- When contents have reached 'full' line, lock container per disposal instructions and place in household trash.

or

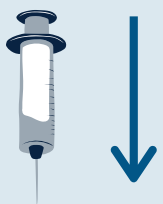

Bring sharps to a **sharps disposal collection location**.

or

Use a thick walled **plastic container** with a tight sealing cap (laundry detergent jug, milk carton, and bleach bottles work best).

Place sharps **down point-first** into puncture-proof, leak resistant container.

Combine sharps with **inedible substances** like coffee grounds or compost.

Clearly **mark container** as "used sharps - do not recycle."

When full, cap container with lid and **duct tape shut**.

Dispose of the container in your household items trash bin.

or

Dispose at your local transfer station in the red bins labeled sharps.

Contact the Idaho Harm Reduction Project at **208-991-4574** or www.idahoharmreductionproject.org for a free, personal sharps container. Supplies mailed discretely and directly to your residence.
